

Avant Quality
Improvement
Grants Program
2018

Terms and conditions

Terms and conditions

The Avant Quality Improvement Grants Program is run by Avant Mutual Group Limited ("Avant") and offers up to eight (8) Avant Quality Improvement Grants to medical practitioners, practices and hospitals ("Avant Grants") to assist funding projects that support sustainable processes and practices that improve the Quality and Safety outcomes for patients.

If there are insufficient numbers or quality of applications for a particular category, Avant reserves the right to vary the number and value of the Avant Grants offered.

Avant Grants

On offer are eight grants in the following categories:

- Two grants of up to \$20,000 each allocated to practices or hospital entities.
- Six grants of up to \$10,000 each allocated to individual medical practitioners.

Avant will look to award grants to projects designed to improve quality and safety of care, which are focused on the continuous improvement of all processes and the products and services that are the outcomes of those processes. ("Projects").

The *Australian Safety and Quality Framework for Health Care* (2010) describes a vision for safe and high quality health care for all Australians. The Framework defines three principles for safe and high quality care, being that care should be:

- Patient centred
- Driven by information
- Organised for safety

Preference will be given to grant applications that address the following Quality areas:

- **Safety:** Avoiding harm to patients from the care that is intended to help them
- **Effectiveness:** Providing services based on scientific knowledge to all who could benefit and refraining from providing services to those not likely to benefit (avoiding underuse and misuse, respectively)
- **Patient-centeredness:** Providing care that is respectful of and responsive to individual patient preferences, needs, and values and ensuring that patient values guide all clinical decisions
- **Timeliness:** Reducing waits and sometimes harmful delays for both those who receive and those who give care
- **Efficiency:** Avoiding waste, including waste of equipment, supplies, ideas, and energy.
- **Equity:** Providing care that does not vary in quality because of personal characteristics such as gender, ethnicity, geographic location, and socioeconomic status.
